

IPv6

A successful IPv6 transition requires careful planning, the right resources, and most importantly, real know-how.

Migrating to Internet Protocol version 6 (IPv6) is no simple feat—IPv6 transition has been likened to rebuilding the engine of a car traveling at 100 miles per hour. Although expertise in this relatively new IT service area can be hard to find, GTRI has been on the forefront of IPv6 technologies for the past five years, establishing itself as a trusted solution provider with proven IPv6 transition capabilities. Drawing upon extensive real world experience in IPv6 planning and deployment, our consulting team can provide expert direction to guide you through the IPv6 transition process.

Why IPv6?

IPv6 significantly advances the capabilities of IPv4, the first version of the internet protocol formally adopted for general use. An IPv6 transition can deliver substantial benefits to your enterprise, including:

- » Operational cost savings
- » Increased scalability
- » Greater address space
- » Enhanced security
- » Mobility extensions
- » Enhanced performance
- » The capacity to develop and support a much wider range of applications

IPv6 SERVICES FROM GTRI

IPv6 inventory

- Documentation of your current inventory and determination of IPv6 compatibility
- Data gathering expertise

IPv6 training

- IPv6 education for your teams
- Classroom and hands-on training

IPv6 impact analysis and transition plan

- OMB risk analysis methodology
- Custom-tailored planning for your migration

IPv6 application assessment

- Software assessments leveraging COTS tools and our extensive experience
- Review of your operating system constraints

IPv6 experimentation and testing

- Systems testing in our IPv6 laboratory

IPv6 deployment

- Application of dual stack and other IPv6 transition techniques
- Deployment of dual stack DNS servers and IPv6 security

About Global Technology Resources, Inc.

A LETTER FROM GTRI'S EXECUTIVE TEAM

In 1998, we launched our business as a three-man operation out of a home office. Today, GTRI is a 150-person firm with a national footprint, clients across multiple industries, and annual revenues exceeding \$150 million. We have evolved from simply selling computer hardware to delivering strategic IT solutions, which have recently included:

- » Improving the speed and efficiency of the nation's 911 emergency response capabilities
- » Safeguarding a national gas pipeline in accordance with evolving security requirements
- » Enhancing the quality of patient care in a cutting-edge healthcare facility
- » Managing and securing data used in next-generation military, transportation and space exploration projects

Early on, we dedicated ourselves to one principle – customer loyalty. Companies often mention customer satisfaction as a core value, but concrete actions are less common. Over the years, GTRI has taken hundreds of iterative steps to improve service delivery, including:

- » Developing a dedicated customer support model spanning account executives, inside sales representatives, and consulting engineers
- » Customizing, automating and adopting our proprietary service delivery model
- » Building an automated quality tracking system for project delivery and product fulfillment
- » Receiving ISO 9001:2008 quality management certification

We wouldn't be where we are today without our customers' continued support and constructive feedback along the way. We welcome the opportunity to find out how we can help your organization achieve its business goals, and to earn your loyalty.

We look forward to working with you!

Lance K. Vierra
Chairman and President

Greg C. Byles
EVP of Sales

Glenn B. Smith
EVP of Operations

What we do

Data Center Computing

GTRI offers a consultative, holistic approach to help you use your data center resources more effectively and drive down costs.

GlobalSure™ Managed Services

With GlobalSure Managed Services, GTRI keeps an expert eye on your IT so that you can stay focused on your core competencies.

IPv6

Drawing upon extensive experience in IPv6 planning and deployment, GTRI can provide expert direction to guide you through the IPv6 transition process.

IT Staffing

GTRI aligns itself with the most talented IT professionals in key markets to help you meet your staffing needs.

Network Consulting

Expert GTRI consultants can optimize your network for availability, performance, scalability, flexibility, security, lower cost of ownership, and ease of operation.

Security

GTRI can design and implement a customized security solution to help you protect your core network, minimize risk, and keep your business-critical systems up and running.

Service Contract Support

When you purchase hardware from GTRI, we manage your service contracts at no additional charge, providing you with a single point of contact and accountability.

Structured Cabling

GTRI offers comprehensive cabling solutions that deliver long-lasting benefits, including lower costs for relocations, changes, and upgrades.

Unified Communications

With an expert UC solution from GTRI, you can empower your employees and co-workers to connect virtually anywhere, at any time.

Wireless

GTRI delivers end-to-end wireless solutions customized to each customer's unique requirements for range, coverage, performance, security, and manageability.
