

# Information Security

*Information assurance so you can stay focused on your business.*

GTRI designs, builds and delivers security products, services and solutions for the enterprise and federal market. We approach security from the standpoint of intellectual property, standards-based technologies, industry leading products and innovative solutions that are repeatable for our clients' information assurance program. With the combination of past performance, extensive capabilities, and the depth and breadth of our relationships, GTRI has the ability to protect your company in all aspects of security.

## WHY INFORMATION SECURITY?

Regardless of which verticle industry your business is in, security is an ongoing investment in protecting your assets. GTRI helps clients design and budget for security projects with a practical approach that helps clients see value in security investments.

- » **Security Engineering:** GTRI provides a unique blend of security engineering services to install, test and tune your security product solutions.
- » **Security Testing:** GTRI handcrafts security testing for your specific needs using the latest tools and techniques to test your network and applications posture.
- » **Security Ownership:** GTRI helps you visualize a long-term security practice so that either you or GTRI can sustain the security planning, implementation and managed services needed to keep your organization, brand and data safe.

- Penetration Testing
- Social Engineering Testing

# About Global Technology Resources, Inc.

## Relentless Commitment

GTRI is a Consulting Solutions Integrator with a broad range of information technology expertise serving enterprise, federal and state government, healthcare, educational, and other markets nationwide. Our core practice areas of expertise include Physical Infrastructure, Integrated Solutions, and Network Monitoring & Management.

### OUR MISSION

At GTRI, we help our clients surpass their strategic business initiatives by delivering best-in-class technical solutions. We listen carefully to each client's unique requirements, provide a consultative approach to develop the right solution to meet objectives, and deliver results based on a proven methodology.

### WHY CHOOSE GTRI

You are making significant investments to plan and adopt new technology solutions that **MUST** be aligned with your business strategy, and it only follows that your partners should drive real value into your organization through successful execution of critical initiatives such as productivity gains, cost reductions, customer satisfaction, and employee retention. At GTRI, we do not view your projects as information technology changes, but as business improvement outcomes.

### OUR APPROACH

Our operational excellence brings tangible, incremental value to our clients through personnel, processes, and systems, as a true "trusted advisor." We apply Strategic Delivery Framework, our proven consulting framework, to align client vision with our expertise to mitigate risk and strategically solve our clients' business objectives.

### OUR EMPLOYEES

We have a relentless commitment to business integrity and strong ethical practices, complete customer satisfaction, and employee recognition and growth. The well being of our employees is essential and we all hold true to our corporate core values.

### GTRI COMMUNITY SERVICE

GTRI and its employees support a variety of non-profit and other charitable organizations as part of our commitment to support our communities and raise social awareness within our business network.

## What we do

### Physical Infrastructure

Through efficient project execution, our experts create wireless and structured cabling solutions that become the reliable foundation on which critical business applications depend. Beyond creating simple connectivity between the network and end-user, our practice follows time-proven design and deployment processes with the goal of exceeding our clients' business and technical expectations. Committed to your success, our clients benefit from our close collaboration with other GTRI technical business units and our extensive depth of experience.

### Integrated Solutions

GTRI's Integrated Solutions consulting practice adds value beyond connectivity by combining our multi-disciplinary expertise to deliver business applications encompassing advanced network engineering, network security, collaborative solutions, and virtualization. The team leverages its business and specialized technical expertise and employs a collaborative, structured, repeatable approach to deliver best-of-breed technology solutions. Our industry expert consultants listen and work closely with our clients to deliver solutions that effectively address business objectives. By combining multiple practices under one business unit, our experts can collaborate across each layer and determine the best solution.

### Network Monitoring and Management

GTRI's Network Monitoring and Management teams offer enterprise systems management utilizing high-end products for end-to-end views of your IT infrastructure. These teams include Enterprise Service Management and GlobalSure™ Managed Services. Our integrated approach to resource allocation, monitoring and provisioning, and proactive problem prevention, coupled with remediation by certified engineers, mitigates risk and allows for true optimization of the infrastructure. Collaboration with our other professional services practices ensures that attention is given to the complete IT lifecycle, from architecture, to deployment, and finally to the management, health and welfare of your critical technology investments.
