

Physical Security

Protect your assets, forward your mission.

GTRI's Physical Security Practice is led by experts with extensive, hands-on experience helping federal and enterprise clients optimize security management and protect assets of all kinds. With customized solutions for each unique organization, our clients benefit from proactive and stronger security, lowered costs, and strategically integrated technologies that empower the safety of the mission. Whether integrating a point product, service, or a multi-faceted solution, GTRI expertise helps turn physical security into a cost-effective mission enabler.

WHY PHYSICAL SECURITY?

Security enforcement personnel face threats that are more motivated, funded, and sophisticated than ever while facilities and perimeters are more difficult to secure. With GTRI's data-centric and management-focused solutions, our clients mediate these factors while lowering costs and improving security posture.

- » **Physical Security Information Management:** GTRI designs and implements systems optimized to integrate and analyze information from traditional disparate physical security devices and systems and present the necessary data to automatically or manually resolve the situation.
- » **Video Surveillance:** GTRI's expertise with IP network design and implementation alleviates the headaches of IP video migrations.
- » **Physical Access Control:** GTRI will help you meet the requirements of mandates such as HSPD-12.
- » **Intrusion Detection Systems:** Integrated facility protection empowered by the IP network enables protection of the perimeter, buildings, and secure areas.
- » **Fiber Optic Solutions:** Enable comprehensive, accurate perimeter and network security via extremely sensitive fiber optic solutions.

Physical Security Services from GTRI

Envisioning

- Review mission objectives
- Perform vulnerability assessments
- Identify and remediate security gaps

Planning

- Solution and strategy design
- Network readiness assessments
- IP local and wide area network design
- Technology roadmaps

Execution

- Full network and solution implementation

Manage

- Centrally managed systems
- Multi-vendor integration
- Post-deployment support

About Global Technology Resources, Inc.

Relentless Commitment

GTRI is a Consulting Solutions Integrator with a broad range of information technology expertise serving enterprise, federal and state government, healthcare, educational, and other markets nationwide. Our core practice areas of expertise include Physical Infrastructure, Integrated Solutions, and Network Monitoring & Management.

OUR MISSION

At GTRI, we help our clients surpass their strategic business initiatives by delivering best-in-class technical solutions. We listen carefully to each client's unique requirements, provide a consultative approach to develop the right solution to meet objectives, and deliver results based on a proven methodology.

WHY CHOOSE GTRI

You are making significant investments to plan and adopt new technology solutions that **MUST** be aligned with your business strategy, and it only follows that your partners should drive real value into your organization through successful execution of critical initiatives such as productivity gains, cost reductions, customer satisfaction, and employee retention. At GTRI, we do not view your projects as information technology changes, but as business improvement outcomes.

OUR APPROACH

Our operational excellence brings tangible, incremental value to our clients through personnel, processes, and systems, as a true "trusted advisor." We apply Strategic Delivery Framework, our proven consulting framework, to align client vision with our expertise to mitigate risk and strategically solve our clients' business objectives.

OUR EMPLOYEES

We have a relentless commitment to business integrity and strong ethical practices, complete customer satisfaction, and employee recognition and growth. The well being of our employees is essential and we all hold true to our corporate core values.

GTRI COMMUNITY SERVICE

GTRI and its employees support a variety of non-profit and other charitable organizations as part of our commitment to support our communities and raise social awareness within our business network.

What we do

Physical Infrastructure

Through efficient project execution, our experts create wireless and structured cabling solutions that become the reliable foundation on which critical business applications depend. Beyond creating simple connectivity between the network and end-user, our practice follows time-proven design and deployment processes with the goal of exceeding our clients' business and technical expectations. Committed to your success, our clients benefit from our close collaboration with other GTRI technical business units and our extensive depth of experience.

Integrated Solutions

GTRI's Integrated Solutions consulting practice adds value beyond connectivity by combining our multi-disciplinary expertise to deliver business applications encompassing advanced network engineering, network security, collaborative solutions, and virtualization. The team leverages its business and specialized technical expertise and employs a collaborative, structured, repeatable approach to deliver best-of-breed technology solutions. Our industry expert consultants listen and work closely with our clients to deliver solutions that effectively address business objectives. By combining multiple practices under one business unit, our experts can collaborate across each layer and determine the best solution.

Network Monitoring and Management

GTRI's Network Monitoring and Management teams offer enterprise systems management utilizing high-end products for end-to-end views of your IT infrastructure. These teams include Enterprise Service Management and GlobalSure™ Managed Services. Our integrated approach to resource allocation, monitoring and provisioning, and proactive problem prevention, coupled with remediation by certified engineers, mitigates risk and allows for true optimization of the infrastructure. Collaboration with our other professional services practices ensures that attention is given to the complete IT lifecycle, from architecture, to deployment, and finally to the management, health and welfare of your critical technology investments.
