Revolution Security

High-security integrated appliances for unparalleled protection

Every year, cyber attacks become more sophisticated and enterprise data breaches become costlier. For companies managing sensitive data billions of dollars and invaluable customer loyalty are at stake.

Now, GTRI is offering Revolution Security's RevSecure™ appliances to provide unparalleled edge-of-network protection for organizations with heightened security needs. RevSecure appliances allow enterprises to:

- **Safeguard data with the strongest protection on the market.** RevSecure solutions leverage Real Privacy Management -RPM™- technology to provide continuous mutual authentication. Dynamic rekeying of every transmission keeps data secure in-transit.
- **Maintain a fast, efficient network.** RevSecure appliances provide maximum protection without compromising network speed.
- **Easily administer network devices and applications.** bitOS™ technology provides a one-stop command and control center for easy configuration and management of RevSecure appliances.
- **Scale and adapt to accommodate changing needs.** RevSecure solutions can be easily expanded and can adapt to any changes in network topology.

RevSecure NETWORK APPLIANCES

- RPM-Continuous mutual authentication via dynamic rekeying of every transmission
- Layer 2, Layer 3 and Layer 4 modes of protection
- AES 128 or AES 256 bit encryption, SHA-1 HMAC
- Static Key or RSA/TLS modes
- FIPS 140-2 level 1 validated cryptographic module (optional)
- Available in four models
 - **RevSecure 10**
10 mbps full-duplex wire speed data security
 - **RevSecure 100**
100 mbps full-duplex wire speed data security
 - **RevSecure 1000**
1 Gbps full-duplex wire speed data security
 - **RevSecure 10000**
10 Gbps full-duplex wire speed data security
- Stateful Filtering
- Support for IPv6
- Link Modes
 - Point-to-Point
 - Point-to-Multipoint
 - Secure multicast
- Device Management
 - SNMPv2 support
 - Syslog
 - Out of band, Secure (TLS) mgt GUI

About Global Technology Resources, Inc.

In 1998, we launched our business as a three-man operation out of a home office. Today, GTRI is a 160-person firm with a national footprint, clients across multiple industries, and annual revenues exceeding \$200 million. We have evolved from simply selling computer hardware to delivering strategic IT solutions, which have recently included:

- » Improving the speed and efficiency of the nation's 911 emergency response capabilities
- » Safeguarding a national gas pipeline in accordance with evolving security requirements
- » Enhancing the quality of patient care in a cutting-edge healthcare facility
- » Managing and securing data used in next-generation military, transportation and space exploration projects

Early on, we dedicated ourselves to one principle – customer loyalty. Companies often mention customer satisfaction as a core value, but concrete actions are less common. Over the years, GTRI has taken hundreds of iterative steps to improve service delivery, including:

- » Developing a dedicated customer support model spanning account executives, inside sales representatives, and consulting engineers
- » Customizing, automating and adopting our proprietary service delivery model
- » Building an automated quality tracking system for project delivery and product fulfillment
- » Receiving ISO 9001:2008 quality management certification

We wouldn't be where we are today without our customers' continued support and constructive feedback along the way. We welcome the opportunity to find out how we can help your organization achieve its business goals, and to earn your loyalty.

We look forward to working with you!

Lance K. Vierra
President and Chairman

What we do

Data Center Computing

GTRI offers a consultative, holistic approach to help you use your data center resources more effectively and drive down costs.

GlobalSure™ Managed Services

With GlobalSure Managed Services, GTRI keeps an expert eye on your IT so that you can stay focused on your core competencies.

IPv6

Drawing upon extensive experience in IPv6 planning and deployment, GTRI can provide expert direction to guide you through the IPv6 transition process.

IT Staffing

GTRI aligns itself with the most talented IT professionals in key markets to help you meet your staffing needs.

Security

GTRI can design and implement a customized security solution to help you protect your core network, minimize risk, and keep your business-critical systems up and running.

Service Contract Support

When you purchase hardware from GTRI, we manage your service contracts at no additional charge, providing you with a single point of contact and accountability.

Structured Cabling

GTRI offers comprehensive cabling solutions that deliver long-lasting benefits, including lower costs for relocations, changes, and upgrades.

Unified Communications

With an expert UC solution from GTRI, you can empower your employees and co-workers to connect virtually anywhere, at any time.

Wireless

GTRI delivers end-to-end wireless solutions customized to each customer's unique requirements for range, coverage, performance, security, and manageability.

Enterprise Service Management

GTRI delivers end-to-end systems management and monitoring solutions that allow you to improve the functionality of your existing infrastructure.
