

Security Solutions

It's no secret that failing to protect your core network has serious consequences. But do you know just how costly it can be for your enterprise?

The average annual cost of downtime caused by security breaches ranges from \$30,000 for small companies to more than \$3 million for large organizations. Other repercussions can be even more devastating than the financial losses:

- » **Tarnished image.** A well-publicized security breach can do lasting damage to your organization's brand and business reputation.
- » **Reduced productivity.** When security incidents bring down your core network, employee productivity suffers.
- » **Loss of customer loyalty.** Network downtime can prevent customers from accessing key services and applications.
- » **Exposure of sensitive data.** Intrusions into your confidential business data – or your customers' data – can threaten the success of your business.

When it comes to protecting your business, you need a partner you can trust. An expert provider of end-to-end security solutions, GTRI can help you safeguard your core network, minimize risk, and keep your business-critical systems up and running.

SECURITY SOLUTIONS FROM GTRI

Planning and assessment

- Vulnerability assessment (wired and wireless)
- Network reconnaissance and penetration testing
- Vulnerability scanning software and appliances
- Custom security testing services
- Enterprise security policy best practices

Optimization

- Firewall technologies
- Virtual private network technologies
- Intrusion detection/prevention
- Authentication/authorization/accounting

- E-mail security systems
- Web content filtering and reporting software
- Server and desktop hard drive encryption

Management and operations

- Security Information Management Systems (SIMS)
- Endpoint policy enforcement
- Security awareness training and knowledge transfer
- Security configuration management and change detection systems

About Global Technology Resources, Inc.

A LETTER FROM GTRI'S EXECUTIVE TEAM

In 1998, we launched our business as a three-man operation out of a home office. Today, GTRI is a 150-person firm with a national footprint, clients across multiple industries, and annual revenues exceeding \$150 million. We have evolved from simply selling computer hardware to delivering strategic IT solutions, which have recently included:

- » Improving the speed and efficiency of the nation's 911 emergency response capabilities
- » Safeguarding a national gas pipeline in accordance with evolving security requirements
- » Enhancing the quality of patient care in a cutting-edge healthcare facility
- » Managing and securing data used in next-generation military, transportation and space exploration projects

Early on, we dedicated ourselves to one principle – customer loyalty. Companies often mention customer satisfaction as a core value, but concrete actions are less common. Over the years, GTRI has taken hundreds of iterative steps to improve service delivery, including:

- » Developing a dedicated customer support model spanning account executives, inside sales representatives, and consulting engineers
- » Customizing, automating and adopting our proprietary service delivery model
- » Building an automated quality tracking system for project delivery and product fulfillment
- » Receiving ISO 9001:2008 quality management certification

We wouldn't be where we are today without our customers' continued support and constructive feedback along the way. We welcome the opportunity to find out how we can help your organization achieve its business goals, and to earn your loyalty.

We look forward to working with you!

Lance K. Vierra
Chairman and President

Greg C. Byles
EVP of Sales

Glenn B. Smith
EVP of Operations

What we do

Data Center Computing

GTRI offers a consultative, holistic approach to help you use your data center resources more effectively and drive down costs.

GlobalSure™ Managed Services

With GlobalSure Managed Services, GTRI keeps an expert eye on your IT so that you can stay focused on your core competencies.

IPv6

Drawing upon extensive experience in IPv6 planning and deployment, GTRI can provide expert direction to guide you through the IPv6 transition process.

IT Staffing

GTRI aligns itself with the most talented IT professionals in key markets to help you meet your staffing needs.

Network Consulting

Expert GTRI consultants can optimize your network for availability, performance, scalability, flexibility, security, lower cost of ownership, and ease of operation.

Security

GTRI can design and implement a customized security solution to help you protect your core network, minimize risk, and keep your business-critical systems up and running.

Service Contract Support

When you purchase hardware from GTRI, we manage your service contracts at no additional charge, providing you with a single point of contact and accountability.

Structured Cabling

GTRI offers comprehensive cabling solutions that deliver long-lasting benefits, including lower costs for relocations, changes, and upgrades.

Unified Communications

With an expert UC solution from GTRI, you can empower your employees and co-workers to connect virtually anywhere, at any time.

Wireless

GTRI delivers end-to-end wireless solutions customized to each customer's unique requirements for range, coverage, performance, security, and manageability.
