

Wireless

Innovative solutions to meet your demands for business application connectivity: anytime and anywhere.

Leveraging over a decade of experience, our wireless experts create secure enterprise-class wireless LANs (WLANs), wireless WANs, and in-building cellular voice extensions that become the reliable foundation on which your critical business applications depend. Our wireless practice combines time-proven processes, industry knowledge, and leading-edge tools to create wireless solutions customized to each unique requirement. We take a holistic approach to wireless projects and, when needed, work closely with other GTRI technical business units to consider all aspects when creating complete, end-to-end network systems.

WHY WIRELESS?

Innovative wireless services are critical in helping organizations maintain agility and increase efficiency. Wireless network integration services from GTRI provide real, tangible benefits to our clients:

- » **Increased productivity:** Enjoy anytime, anywhere access to your critical voice, video, and business applications for your increasingly mobile workforce.
- » **Convenience for employees and guests:** Provide wireless Internet access and in-building cellular voice extensions as an amenity to employees, enterprise guests, and vendors.
- » **Reduced WLAN operating costs:** Scalability, reliability, and network management ease are products of a precisely designed and deployed WLAN.
- » **Reduced WAN operating costs:** Replace or augment existing leased circuits with wireless point-to-point links in order to reduce or eliminate monthly recurring telco charges.

Wireless Services from GTRI

Envisioning

- Determine long-term business and technical needs

Planning

- Assess network readiness, design constraints and design freedoms
- Perform detailed spectrum analysis, RF design, and logical network design
- Document complete design

Execution

- Equipment sourcing
- Network installation
- Network configuration, testing and validation
- Training and knowledge transfer
- Day 2 support
- Solution documentation

Diagnostics Services

- Spectrum analysis to determine interference sources
- Application and network performance analysis
- Remediation planning

About Global Technology Resources, Inc.

Relentless Commitment

GTRI is a Consulting Solutions Integrator with a broad range of information technology expertise serving enterprise, federal and state government, healthcare, educational, and other markets nationwide. Our core practice areas of expertise include Physical Infrastructure, Integrated Solutions, and Network Monitoring & Management.

OUR MISSION

At GTRI, we help our clients surpass their strategic business initiatives by delivering best-in-class technical solutions. We listen carefully to each client's unique requirements, provide a consultative approach to develop the right solution to meet objectives, and deliver results based on a proven methodology.

WHY CHOOSE GTRI

You are making significant investments to plan and adopt new technology solutions that **MUST** be aligned with your business strategy, and it only follows that your partners should drive real value into your organization through successful execution of critical initiatives such as productivity gains, cost reductions, customer satisfaction, and employee retention. At GTRI, we do not view your projects as information technology changes, but as business improvement outcomes.

OUR APPROACH

Our operational excellence brings tangible, incremental value to our clients through personnel, processes, and systems, as a true "trusted advisor." We apply Strategic Delivery Framework, our proven consulting framework, to align client vision with our expertise to mitigate risk and strategically solve our clients' business objectives.

OUR EMPLOYEES

We have a relentless commitment to business integrity and strong ethical practices, complete customer satisfaction, and employee recognition and growth. The well being of our employees is essential and we all hold true to our corporate core values.

GTRI COMMUNITY SERVICE

GTRI and its employees support a variety of non-profit and other charitable organizations as part of our commitment to support our communities and raise social awareness within our business network.

What we do

Physical Infrastructure

Through efficient project execution, our experts create wireless and structured cabling solutions that become the reliable foundation on which critical business applications depend. Beyond creating simple connectivity between the network and end-user, our practice follows time-proven design and deployment processes with the goal of exceeding our clients' business and technical expectations. Committed to your success, our clients benefit from our close collaboration with other GTRI technical business units and our extensive depth of experience.

Integrated Solutions

GTRI's Integrated Solutions consulting practice adds value beyond connectivity by combining our multi-disciplinary expertise to deliver business applications encompassing advanced network engineering, network security, collaborative solutions, and virtualization. The team leverages its business and specialized technical expertise and employs a collaborative, structured, repeatable approach to deliver best-of-breed technology solutions. Our industry expert consultants listen and work closely with our clients to deliver solutions that effectively address business objectives. By combining multiple practices under one business unit, our experts can collaborate across each layer and determine the best solution.

Network Monitoring and Management

GTRI's Network Monitoring and Management teams offer enterprise systems management utilizing high-end products for end-to-end views of your IT infrastructure. These teams include Enterprise Service Management and GlobalSure™ Managed Services. Our integrated approach to resource allocation, monitoring and provisioning, and proactive problem prevention, coupled with remediation by certified engineers, mitigates risk and allows for true optimization of the infrastructure. Collaboration with our other professional services practices ensures that attention is given to the complete IT lifecycle, from architecture, to deployment, and finally to the management, health and welfare of your critical technology investments.
